

I started as an EMT as soon as I got my driver's license and stayed in that role, which I loved, for a couple of years before I decided to study to become a paramedic. I'm proud to say I've been in this job for several years. It was a natural transition, and now I get to perform advanced medical procedures and have way more responsibilities on the job.

Some shifts are less dramatic than others, sure, but while they are never predictable, I feel like they are always important. I might be helping to save someone's grandparent after they had a fall, or someone's parent when they had a heart attack, or someone's sibling who got into a nasty car accident--the list goes on. I never forget how connected we all are and how life can change drastically in the blink of an eye. Being a paramedic is public service to the extreme, action-packed, and full of empathy. This is a fast-paced job with high rewards, and I will never, ever take my job for granted.

Occupation:

Paramedic

Salary:

\$56,257

Education:
