

Charlene Warren-Fisher - 46

“Some people like to start new projects, but I like to finish things. Sending a well-built, quality product out to customers lets me check one more off my list and go home feeling great. It takes focus and skill to line up parts with hoists and then connect them with bolts and screws. I like that our team rotates to different jobs on the line, so I can keep learning and working my way up. With so many manufacturing jobs in this state, being an assembler is a great way to start working right out of high school and build a career.”

Occupation:

Assembly
Technician

Salary:

\$46,329

Education:

High School Diploma
or Equivalent

Job Description:

Team Assemblers work as part of a team having responsibility for assembling an entire product or component of a product. Team assemblers can perform all tasks conducted by the team in the assembly process and rotate through all or most of them, rather than being assigned to a specific task on a permanent basis. May participate in making management decisions affecting the work. Includes team leaders who work as part of the team.*
